DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of the election of species requirement in the reply filed on October 24, 2005 is acknowledged. The traversal is on the ground(s) that the mechanical device used to elevate the closure caps of the two embodiments is not a unique teaching and the embodiments are not patentably distinct. This is not found persuasive because the structure of one embodiment is obvious in view of the other. Thus, the embodiments are patentably distinct. The requirement is still deemed proper and is therefore made FINAL.
2. Applicant cannot withdraw the provisional election made February 23, 2005. See below.
3. This application contains claims 10-19 drawn to an invention nonelected with traverse in the response filed October 24, 2005. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01 which reads in part "If a final requirement for restriction is made by the examiner, applicant may file a petition under 37 CFR 1.144 for review of the restriction requirement."

Drawings

4. The drawings were received on August 10, 2005. These drawings are approved.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Hakim (US 3,157,302).

As set forth in the instant application, the threads of Hakim serve to retain and elevate the closure with respect to the container. The upper surface and the lower surface of the threads are retention means and elevating means, restrictively.

Claim Rejections - 35 USC § 103

7. Claims 8 and 9 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hakim.

As previously set forth, the retention means are the threads. To the degree the threads are not seen as a continuous bead, it would have been obvious to one having ordinary skill in the art at the time the invention was made to form the threads of an engaging bead since the examiner takes Official Notice of the equivalence of threads and beads for their use in the closure art and the selection of any of these known equivalents to secure a closure to a container would be within the level of ordinary skill in the art.

Allowable Subject Matter

8. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 3727

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

10. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (571) 273-8300. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.

11. It is called to applicant's attention that if a communication is faxed before the reply time has expired, applicant may submit the reply with a "Certificate of Facsimile" which merely asserts that the reply is being faxed on a given date. So faxed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:

I hereby certify that this correspondence for Application Serial No. _____ is being facsimiled to The U.S. Patent and Trademark Office via fax number 571-273-8300 on the date shown below:

Typed or printed name of person signing this certificate
